👉 My Portfolio

### Profile

Aspiring Java Backend Developer. An individual who can write clean and optimized code. Like to solve Data Structure and Algorithms problems. Looking for enhancing my skills as a Backend Developer.

### Education

**Java Backend Developer(Full Time),**  
*Masai School*

11/2021 – 2022

learned backend(JAVA,MySQL) as well as frontend(HTML,CSS,JS) and more over DSA(500+ problem).

**B-Tech(EE), Purulia Government**  
*Engineering College*

2017 – 2021 | Purulia, India

Graduate in Electrical Engineering with 8.4CGPA.

### Soft Skills

Problem Solver | Team Worker |  
Adaptable | Decision-maker

### Technical Skills

DSA | Java | MySQL | SpringBoot | Maven | Hibernate |  
Postman | Swagger | HTML | CSS | Java Script

### Projects

#### Trip Makers, An Online Trip Management System

**Code Base:** <https://github.com/adnan25042001/Trip-Makers>

The backend of online trip management is where the admin can log in to the system and manage the website's features. And the customer can also log in and perform activities such as view routes, hotels, and packages, book, cancel and print ticket details, and provide feedback.

**Tech-Stack:**

**Client:** Java, SpringBoot, JPA with Hibernate  
**RDBMS:** MySQL | **Testing:** Postman, Swagger

#### Online Store Management System

**Code Base:**

<https://github.com/RaJiBuLmOLLaPGEC/ItemZone>

This is a console base java application by which the user and admin can log in and perform some operations like View products, Buy products, Add products, etc.

**Tech-Stack : Client:** Java | **RDBMS:** MySQL

#### KFC Clone

Code Base:

<https://github.com/srbhkumar624/kfcclonewebsite>

KFC is a cloud kitchen restaurant and we made a clone of its online order platform within 7 days.

Features

- End-to-End product purchasing flow from the website.
- Chose as per your wish from the menu section.

**Tech-Stack**

**CSS | HTML | JAVASCRIPT**

#### Geekbuying Clone

GitHub Link:

<https://github.com/RaJiBuLmOLLaPGEC/geekbuying>

Geekbuying is an electronics product brand and I made a clone of its online retail platform.

Features:

- Can remove unwanted product form cart.
- Provide sign-up and log-in features.

**Tech-Stack**

**CSS | HTML | JAVASCRIPT**
